DAYTON, Ohio, May 12, 1972 --- The University of Dayton Mathematics Department is to be the recipient of a \$1,500 grant from the General Electric Corporation. This is the fourth consecutive year that the University has been awarded the grant. It also brings to \$26,469.50 the total amount of money the General Electric Foundation has granted to U.D. since 1956. This money has been granted for various reasons, including the Matching Gift program, the Math Department and Capital Campaigns.

The grant is part of a more than \$3,285,000 educational support package sponsored in 1972 by the General Electric Company and the General Electric Foundation, an independent trust established by the company in 1952. These grants are given in support of such projects as research, educational incentive, fellowship programs, continued development of curricula, and equipment assistance grants.
